## **Sports areas & disciplines**

### **FREESTYLE PARK**

FISE Freestyle Park covers an area of 1500m<sup>2</sup> and is made up of iron and wood structures. These are oversized to meet the needs of the pros while maintaining the various lines for amateurs to enjoy as well.

#### **UCI BMX FREESTYLE PARK WORLD CUP**

One of the most exciting FISE disciplines, BMX Freestyle Park is characterised by aerial tricks made possible by the shape of the structures and speed of the riders. While the technicality of the tricks is very important to the scoring, other criteria such as the use of the whole Park and the originality of the chosen lines are also key components of the scoring system. The sport makes its Olympic debut at the Tokyo 2020 Olympics.

#### **WS ROLLER FREESTYLE PARK WORLD CUP**

Roller Freestyle Park athletes are able to achieve maximum speed during their runs, which enables them to string together impressive aerial tricks and slick grinds. Each run is judged on the individuality of the riders run as well as their technical skills and range. Since the sport's launch, its followers have been committed to preserving its essence and promoting its lifestyle.

### **FLATLAND AREA**

Always located so it can be seen by as many spectators as possible, the FISE Flatland area looks like a theatre stage. It offers optimal views for spectators who can get up close to where the riders perform.

#### **UCI BMX FLATLAND WORLD CUP**

The simplicity of a flat surface and the creativity provided by 20-inch bikes make BMX Flatland the most artistic urban sports discipline. Riders combine skill, balance and creativity to perform a kind of dance with their bike; the subtlety of each trick and overall aesthetics of the run always count in the scoring. Placed at the heart of each Festival, this competition has quickly become a staple of FISE.

## **STREET PARK**

Benches, ramps and steps complete the boxes and quarter pipes to create a versatile and diverse Street area. The aim is to create a space that replicates urban architecture, so that riders can create the kind of lines they thrive on in their own cities.

## **SKATEBOARD STREET**

Initially a simple way to get about, Skateboard expanded in the '80s to become the popular sport it is today. The influence of its way of life emanates across all cultural fields, and the sport continues to expand thanks to its inclusion in the Tokyo 2020 Olympics. Riders create runs where tricks and commitment count as much as versatility of their lines.

## **SCOOTER FREESTYLE**

Scooter Freestyle is one of the newest action sports. Across the world, an increasing number of people are riding scooters on the streets and in parks. Despite being a relatively new sport, riders are already pushing it to new heights. For the most part, tricks are inspired by BMX as the handlebars and two wheels are often similar in both sports. Nonetheless, riders do occasionally take inspiration from Skateboard!

## **DIRT TRAIL**

Built exclusively from earth, the Dirt Trail sets out a series of humps from start to finish. The height varies between 1 and 5 metres depending on where they are placed, and they're set out so riders can maintain their speed.

## **BMX DIRT**

Whether on a "homemade" track at the bottom of the garden or on one specially created for international competition, BMX DIRT harks back to the discipline's authentic values. The judges consider the runs of each rider according to their range and successful tricks, but it's style and the impression left on the audience that takes precedence over pure technicality.
