

FISE MONTPELLIER 2022

SPINE RAMP

FISE Montpellier is a selection of contests in sports areas and parks that have been specifically designed and assembled by Hurricane Group to enhance the performances of riders at the highest world level while remaining accessible to junior and amateur categories.

Urban sports communities are full of riders who stand out for their commitment. Whether involved with new generations of riders, social causes, or the reputation of their discipline(s), many of them carry their enthusiasm into the wider world.

SPINE RAMP

Spine Ramp comprises two ramps linked by a central ridge to form a W which enables athletes to create aerial tricks while giving spectators the best possible view.

SPINE RAMP CONTESTS: BMX, SKATEBOARD, ROLLER, SCOOTER

Whatever the discipline, Spine Ramp is all about putting on a show. Riders execute their runs using each side of the ramp and the central ridge as crowds gather around the structure. Although the tricks differ in BMX Freestyle, Skateboard, Scooter Freestyle and Roller Freestyle, all disciplines appreciate the versatility of the ramp structure.
