## **AN OUTSTANDING COMPETITION WITH STRONG VALUES**

### **FROM RIDE SPOTS TO MINI-CAR CIRCUITS**

For its 2022 edition, the digital transformation of E-FISE Junior by Hot Wheels is dedicated to young people and to the inherently passionate creativity they mobilize. In most urban disciplines, riders evolve in a practice space where there are different configurations, whether in Parks or Streets. In all cases, the point is to make the most beautiful and creative lines, the ones that optimize the rider's speed and enable them to achieve whatever tricks they want.

The creative process is exactly the same whichever lines you are working on, whether in BMX, Skateboard, Roller, Scooter or on mini-car circuits. You must project yourself, try, adapt, try again, until you succeed – or modify the lines until you attain your goal. It is only in scale that mini-car circuits differ from freestyle sports; you still have to put together the elements of the set, choose the best car, and try to make the best of any new configuration.
